

AFX ProSpindles

Wilwood's AFX ProSpindle Kits contain a pair of high strength steel spindles for General Motors 1964-1972 A-Body, 1967-1969 F-Body, 1968-1974 X-Body, and 1969-72 G-Body vehicles. Specifically designed for mounting Wilwood's disc brake kits, they also improve your car's looks and handling. These kits provide a 2.00" drop in ride height for a more aggressive stance, while maintaining wheel travel, and steering geometry. The 1.60" taller spindle body raises the front roll center and decreases camber change to improve grip and turn in, without increasing bump steer. Installs using the OE ball joints using original or aftermarket control arms, and original bolt on steering arms. Kit includes four high grade 1/2"-20 steering arm bolts, two for each spindle.

PN: 831-15890

Note: Some early model A-bodies used steering arms with 7/16" mounting bolts. The bolt holes in the steering arm must be drilled to .50"

For more information and list of brake kits, see flyer [FL486](#)
