

DYNAPRO QUICK-SILVER / LP LOW-PROFILE REAR DRAG KITS

Available Spring 2016

DynaPro Quick-Silver / LP

low profile brake kits provide maximum clearance inside 15" double bead-lock drag race rear wheels. Choices for single and dual caliper kits fill the bill for four wheel disc brakes on door slammers and rear brake only fast bracket dragsters.

Kit Features

- DynaPro Quick-Silver / LP four piston forged calipers with center bridge support, durable nickel finish and stainless steel pistons
- 11.25" diameter S.A.S. Super Alloy Series stainless steel dynamic mount lug-drive rotors
- Forged aluminum hats with stainless steel drive lug inserts and snap ring rotor retention
- Hat options with 3.06" center register for 5 on 4.50", 4.75" and 5.00" bolt circles with either 1/2" or 11/16" wheel studs
- Type 7812-CM compound brake pads deliver high grip, long wear and peak fade resistance at all temperatures
- Complete kits are available for most rear axle flange styles and include the mounting brackets and hardware necessary for a secure installation
