

DYNAPRO SIX PISTON BIG BRAKE KITS FOR 1973-83 CHRYSLER, DODGE, PLYMOUTH

Modern engine power vastly exceeds the original output of Mopar's 1970s cars, so Wilwood's big brake kit brings modern braking that still fits under many 15" wheels. Motorsports-proven Dynapro six piston calipers deliver improved pedal feel through reduced deflection. The larger diameter 12.19" x 0.81" rotors provide greater brake torque and more thermal capacity with aluminum hubs and adapter plates that weigh less than OE components.

Kits designed to fit 1973-1983 Chrysler/Dodge/Plymouth A, B, E, F, and J-body vehicles with no modifications.

KIT FEATURES:

- Complete bolt-on installation using Wilwood forged aluminum hubs and mounting brackets
- Compatible with stock master cylinder, rear brakes, and power brake booster

CALIPERS: DYNAPRO DP6A

- Rigid forged aluminum Dynapro six piston calipers with central stiffening bridge limit deflection for better clamping
- Type III hard-anodized surfaces resist bore wear, and abrasion for extended service life
- Available in gloss red or black powder coat, or 22 additional colors (additional charges may apply)

ROTORS: ULHP 32 VANE VENTED IRON

- Long-grain carbon iron alloy 12.19" x 0.81" rotors with 32 internal cooling vanes
- Available in ULHP plain face or SRP drilled and slotted
- Forged aluminum hub and adapter plate reduce weight

BRAKE PADS: BP-10

- BP-10 *SmartPads* provide good response at low temperature and resist fading as heat increases
- Formulated for lower dust and noise
- Other compounds available

INSTALLATION PARTS:

- Caliper brackets, and all premium-grade hardware for installation are included
- Braided stainless steel Flexline kit required, **P/N 220-8307**
