

FOR IMMEDIATE RELEASE

Wilwood has just released their new 11-inch Internal Drum Parking Brake Rear Kit for 1971-1974 AMC's

Camarillo, CA • May 1, 2011

Wilwood Engineering's new 11-inch Internal Drum Parking Brake Rear Kit is perfect for AMC enthusiasts who are running smaller diameter Original Equipment rear wheel sizes. This kit fits 15-inch diameter wheels and will also work with many 14-inch wheels that are designed to clear disc brakes. The brake kit ([P/N 140-11941](#)) features Wilwood's special internal drum parking brake design that allows an efficient parking brake system. It is easy to install and a snap to hook into the stock parking brake cable system when utilizing Wilwood cable kit. The kit features a low-profile forged billet DynaPro caliper in your choice of either anodized black, or red powder coat. The base kit includes an 11-inch ULHP smooth face vented rotor, or choose the SRP drilled and slotted rotor for a more aggressive appearance. The forged billet DynaPro caliper in this kit will work harmoniously with the AMC front kit.
