

FOR IMMEDIATE RELEASE:

Wilwood Announces New DynaPro Dynamic Mount Front Drag Race Brake Kits

Camarillo, CA • May 2017

Wilwood's most popular front brake kits for high-MPH, door-slammer drag cars are now available with full-floating dynamic mount lightweight steel rotors. A dynamic mount rotor allows controlled movement (float) at the rotor mount points, eliminating thermally induced stress and subsequent rotor distortion (warpage). These benefits, coupled with a controlled knock-back release of the brake pads, extend component life and reduce speed-robbing drag down the track.

Eight new front drag race brake kits are now available for the most popular spindles.

MSRP starts at \$979.99.
