

**FOR IMMEDIATE RELEASE:**

## [Wilwood Disc Brakes Introduces New Forged Dynalite Internal Calipers](#)

**Camarillo, CA • June 2018**

Wilwood's Forged Dynalite Internal (FDLi) aluminum lug mount calipers are the new generation in the Dynalite caliper series. FDLi bodies are manufactured from a new forging designed to increase wheel clearance in the bridge transition, eliminate the need for bridge spacers to accommodate different rotor widths and add overall stiffness with larger 3/8" diameter bridge bolts.

All standard and powder coated models receive a Type III Mil-Spec hard anodized base finish to add durability in the piston bores, and resistance to abrasion and corrosion throughout. These innovations in design, structure, and finishing processes make these the strongest, most durable and visually pleasing Dynalite calipers ever built.

MSRP starts at \$140.34.
