

**FOR IMMEDIATE RELEASE:**

## **Wilwood Disc Brakes Releases Big Brake Kits for Honda Talon 1000 Sport UTVs**

**Camarillo, CA • July 2023**

Wilwood has expanded their new UTV product line with these floating rotor, multi-piston big brake kits for 2019 and up Honda Talon side-by-sides. Six piston front and four piston rear calipers with larger floating rotors improve braking performance and fit most 15" or larger wheels.

Fixed-mount, opposed piston, forged aluminum calipers give balanced clamping with reduced deflection for more braking force. Larger diameter rotors, 11.25" x 0.25" (285mm x 6mm) provide greater brake torque, while the increased thickness reduces heat distortion. Dynamically-mounted floating rotors prevent piston knockback from bumps and reduce thermal stress. High-strength steel rotors are available plain faced or drilled. Calipers are available in glossy red or black powder coat, or 22 additional color options (additional charges may apply).

**MSRP:** starts at \$1,414.91 per axle
