

**FOR IMMEDIATE RELEASE:
Wilwood Big Brake Kits for 1984-87 Corvettes**

Camarillo, CA June 1, 2011

Wilwood [Big Brake](#) upgrades are now available for the front of all 1985-87 model C4's, and the rear of all 1984-87 models. Whether you are customizing a Corvette, or a hot rod based from Corvette suspension, these three new kits will provide all the brake options you need to compliment your wheels, tires, and suspension upgrades. Front kits use the new Billet Narrow Superlite 6 Radial Mount calipers and a choice of either 13" or 14" discs. Rear kits use the new Billet Narrow Superlite 4's with 13" discs.

These track-tested kits will not only provide better street performance, they will make a huge improvement over the original brakes on the track where consistency counts. The complete brake kits are lighter than the original brakes, improving the overall handling of your Corvette. All kits are available with caliper color and rotor style options to match the style and braking requirements of all types of cars. Special kits with race rotors, Thermlock® pistons, and race compound pads can also be custom ordered.

Wilwood performance brake kits are loaded with cutting edge technology built on years of domination in world motorsports and are engineered for easy bolt-on installation. Wilwood's Big Brake Kits are designed to meet the high performance demands of today's tire, wheel and suspension technology.
