

FOR IMMEDIATE RELEASE:
Wilwood Disc Brakes Introduces Their New FSLI4 Calipers

Camarillo, CA, October 28, 2009

Wilwood's new FSLI4 marks a noteworthy change in the evolution of the Superlite caliper series. [FSLI4 and FSLI4/ST](#) calipers will now feature an internal fluid crossover port that eliminates the need for an external tube. This feature is especially beneficial to dirt track racers and any other severe environment applications where off-road dirt and debris can sometimes cause damage to external tubes. FSLI4 calipers will now feature bleed screws on all four corners that eliminate the need for specific right or left calipers on symmetrical piston bore models, and also eliminate the need for specific front or rear mount models on differential piston bore models.
