

## SCCA A-SEDAN SPEC BRAKE KITS 1987 - 2004 MUSTANG

Wilwood Engineering has released two new Road Race brake kits for the SN-95 Mustang front spindle found on all 1994-2004 Mustangs.

### Kit Features:

- Kits feature forged billet Superlite series four piston radial mount calipers with a choice of either heavy wall stainless or Wilwood's exclusive Thermlock pistons for the ultimate in thermal resistance.
- 12.19" x 1.25" rotors are available in the standard HD-48 directional vane configuration, or the premium GT-48 series with pad cleaning slots and individual dynamic balancing.
- Complete front kits also include forged aluminum hats, BP-30 compound "Smart Pads", stainless braided flexlines, and all the necessary mounting hardware.
- Installation of these kits on a SN-95 spindle requires minor modifications to the outside radius of the caliper mounting bosses on the spindle. This is necessary to eliminate interference with the underside of the base of the new caliper mount bracket. These modifications can be accomplished with a hand grinder with the spindle still on the car. Use of these kits on a 1987-93 Fox body Mustang requires the use of the SN-95 spindle.

SCCA A-Sedan Brake Kit  
with GT Rotor

### SL4R/ST-GT Front Kit • M.S.R.P. \$1,988.00

- SL4R/ST Forged Billet Radial Mount Calipers with Thermlock Pistons
- GT-48 Vane Directional Rotors, 12.19"x1.25", Face Slotted & Balanced
- BP-30 Compound Smart Pads, 20mm thick
- GT Forged Aluminum Hats with 12 point stainless lockwire drilled bolts
- Caliper mounting brackets with attachment hardware and alignment shims
- Stainless braided flexlines with fittings

### SL4R-HD Front Kit • M.S.R.P. \$1,575.00

- SL4R Forged Billet Radial Mount Calipers with Stainless Steel Pistons.
- HD-48 Vane Directional Rotors, 12.19"x1.25"
- BP-30 Compound Smart Pads, 20mm thick
- GT Forged Aluminum Hats with 12 point stainless lockwire drilled bolts
- Caliper mounting brackets with attachment hardware and alignment shims
- Stainless braided flexlines with fittings
