

REAR MAZDA MX-5 MIATA, NB ROTOR & HAT UPGRADE KITS

The 2001-2005 Mazda Miata NB with Sports Suspension is a second-generation MX-5 that is a lightweight and fun-to-drive sports car like its predecessor, but now comes with a more powerful engine and a stiffer chassis. With these performance gains, the model could now use improvement in braking capacity, especially for driving events like autocross or track days. Wilwood's new Rear Brake Rotor & Hat upgrade kit offers an easy way to increase thermal braking capacity while reducing weight.

KIT FEATURES:

- Easy bolt-on installation of hat to rotor using factory hubs, spindles and calipers
- Compatible with stock master cylinder and front brakes

ROTORS:

- Long-wearing proprietary iron alloy 10.85" x 0.39" (276mm x 10mm) solid rotors
- Choose plain face, GT slotted, or SRP drilled & slotted and slotted

MOUNTING HAT:

- Short offset fixed mount premium aluminum alloy provides high strength with minimal weight
- Black E-coat finish

INSTALLATION PARTS:

- All necessary premium-grade hardware for mounting the hat to the rotor, and the rotor registration adapter are included
