

FOR IMMEDIATE RELEASE:

Wilwood Disc Brake Releases New Road Race Kit for 2005-2014 Ford Mustangs

Camarillo, CA • November 2021

Wilwood has combined the capabilities of Grand National four piston calipers with lug-drive dynamic-mount rotors in a new road race package for 2005-2014 Ford Mustangs. The kit features the high-capacity braking and heat-management of the GN4R/ST caliper coupled with 13.00" floating rotors on hats utilizing the simple lug-drive mounting system.

This kit is in full compliance with all current SCCA specifications for American Sedan, and is also well-suited to NASA classes and other sanctioning bodies requiring four piston calipers and OE production S197 spindles. It includes GN4R/ST Thermlock piston race calipers, **Spec37** iron alloy GT-48 directional vane rotors and lug-drive hat assemblies, BP-30 race compound **SmartPads**, braided stainless steel flexlines, caliper brackets, and hardware for a bolt-on, no-modifications-required installation.

MSRP: \$3,025.39
