

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Tri-Five Chevy 2" Drop ProSpindle and Brake Kits

Camarillo, CA • January 2023

Wilwood introduces their latest ProSpindle engineered to give 1955-57 Chevrolet Bel Air, and related cars, a 2" lower ride height and simplify performance brake installation. These precision-machined steel ProSpindles provide reinforced brake caliper mounts and an improved stance, while being lighter and stronger than original factory parts. The ProSpindles mount to OE ball joints in stock or aftermarket control arms and reuse factory steering arms with no change to steering or suspension geometry.

Wilwood's ProSpindles, and the five new brake kits, are engineered to work as a system. All the available kit options include performance-proven, forged aluminum, multi-piston calipers with high-temperature seals, stainless pistons, and fade-resistant pads. Premium-grade iron alloy rotors range from 11.50" to 14.00" in diameter, and offer the option of plain, slotted, or drilled and slotted faces

MSRP: Starts at \$419.17
