

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Rear Brake Kits for Classic 1969-1989 Porsche 911

Camarillo, CA • April 2023

Classic Porsche 911 sports car owners now have new rear brake upgrade options from Wilwood. Modern braking power comes from motorsports-proven forged aluminum Dynapro four piston calipers engineered for 911s from 1969-1989 using OE hubs with 3.0" (76,2mm) strut mounting tabs.

All kits include radial-mount brackets for calipers to fit two rotor widths, 11.42" x .80" (280x20mm) and 11.42" x .95" (290x24mm). Complete brake kits include your choice of one-piece vented rotors in GT slotted or SRP drilled and slotted with a black E-coat finish. Caliper-only kits are also available for the two different OE rotor sizes. Dyanpro calipers for Porsche are designed to work with the factory master cylinder and matching Wilwood or OE front brakes to maintain proper brake bias.

The Dynapro calipers feature stainless steel pistons and high-temperature seals, and are available in Le Mans yellow, gloss red, or black powder coat, or 22 additional color options (additional charges apply). Kits include stainless steel Flexlines and BP-10 street performance pads. Multiple other pad compounds are available for your application.

MSRP: starts at \$1,034.60

MSRP: starts at \$922.60

Dynapro Rear Complete Kit
