

FOR IMMEDIATE PRESS RELEASE

Wilwood's New Big Brake Front Hat Kits For Dodge Neon SRT-4

Camarillo, CA June 3, 2010

Wilwood Engineering's newest bolt-on brake kits have been designed to provide high performance braking for the [2004 Dodge Neon SRT-4](#). This kit features forged billet aluminum Dynalite four piston calipers in red or black finish in a strong, compact package. SRS stainless steel wear plates are standard to eliminate caliper bridge wear caused by pad gouging. Also included are 12.19" diameter vented iron rotors in a choice of smooth face or a drilled and slotted pattern. The two-piece rotor design utilizes black anodized billet aluminum hats. Low dust, low noise PolyMatrix "Q" brake pads complete the package to shorten stopping distances, improve handling and eliminate the dressed-up, overworked stock components.

Wilwood High Performance Brake Kits are loaded with cutting edge technology built on years of domination in world motorsports and engineered for easy bolt-on installation. This is Big Brake styling that meets the high performance demands of today's tire, wheel and suspension technology.
