

Wilwood's **GP320** billet four piston race caliper is a compact, high-efficiency performer. Weighing just 1.70 pounds, the **GP320** was purpose-built to fit a wide range of race applications, including, Sprint cars, Midgets, Mini sprint, Flat Track motorcycles, and small formula-type sports cars. The **GP320** offers four bleed screws to accommodate any mount location and two options for rotor width .24" or .81" thick with overall diameters between 9.00" to 11.00" or 9.00" to 11.50", respectively.

A wide variety of pad compounds are available to suit your application.
