

FOR IMMEDIATE RELEASE:

Wilwood Disc Brake conversions for 1964-70 Buick, Oldsmobile, Pontiac rear axles

Camarillo, CA • June, 2014

Buick, Oldsmobile, and Pontiac muscle car enthusiasts can now install parking brake kits on any 1964-70 model 10 bolt 8.2" ring gear rear end using the factory press fit bearing axles. These fully bolt-on conversion kits feature Dynalite or DynaPro Low-Profile forged aluminum 4 piston calipers and an internal drum parking brake mechanism concealed inside a choice of 11.00" or 12.19" rotors based on the wheel sizes being used. Wilwood brake kits are engineered and machined specific by application for precise fit and balanced braking, with the custom styling and performance you would expect from the industry leader in high performance brakes.

Forged Dynalite Rear Parking Brake Kit

DynaPro Low-Profile Rear Parking Brake Kit

Wilwood has been expertly designing and manufacturing high-performance disc brakes in the USA since 1977. Engineered and rigorously tested for the track, Wilwood brakes provide unsurpassed quality and performance with sleek, lightweight designs. Wilwood has dominated the motorsports arena for decades, making their street market brakes among the most technologically advanced around.
