

FOR IMMEDIATE RELEASE:

Wilwood Engineering's New Ford Bronco Front Disc Brake Kits

Camarillo, CA • November, 2015

Wilwood's D8-4 caliper brake upgrade kits for Dana 44 front axle 1976-77 Broncos combine performance and durability to complement wheel, tire and suspension upgrades. D8-4 forged aluminum four piston calipers replace the OE cast iron single piston calipers along with 12.19" diameter two-piece directional vane rotor assemblies to increase the brake leverage, add cooling capacity and reduce overall weight. ProMatrix brake pads provide increased response and high fade resistance under heavy load for all types of highway and off-road driving. The kits are complete with new wheel studs, braided stainless steel flexlines and all the necessary mounting brackets and hardware.

M.S.R.P. starts at \$1,119.99.
