

FOR IMMEDIATE RELEASE:

Wilwood Announces New TX6R Tactical Xtreme Big Brake Front Kits for the 2002-2016 Cadillac Escalade

Camarillo, CA • November, 2016

Wilwood's Tactical Xtreme big brake kits for trucks and SUVs incorporate extreme environment design and material technology, based on tactical and armored vehicle requirements. TX6R big brakes provide unmatched performance and durability for all types of high-demand highway, towing, hauling, off-road and other heavy-load applications.

Large 16" diameter **Spec37** alloy GT series rotors add mechanical leverage to improve the safety and stopping power when larger, oversized wheels and tires are being used. The directional vane design of the GT series rotors quickly dissipates heat to keep the brakes operating effectively in the peak temperature ranges. Ultra high-capacity TX6R forged aluminum radial mount calipers, with six differential bore stainless steel pistons, generate the highest possible clamping efficiency with the factory hydraulics and fluid controls. BP-20 compound composite metallic formula *SmartPads* deliver high response, rotor- and driver-friendly performance.

MSRP starts at \$2,127.94.
