

FOR IMMEDIATE PRESS RELEASE
Wilwood Brake Kits for C5 and C6 Corvettes

Camarillo, CA June 3,2010

Wilwood Engineering announces improved good looks and braking performance for C5 and C6 Corvettes. Our new [front W6A Big Brake kit](#) is designed for easy bolt-on installation and is compatible with the OE master cylinder and ABS system.

Kits include forged six piston differential bore calipers in black or red, or other custom Wilwood color by special order. Large 14.25" diameter x 1.25" thick curved vane (SV-GT) slotted rotors for high heat applications. The rotors are mated to black "signature" anodized aluminum hats for reduced rotating weight and improved stability under thermal load.

Additional kit highlights include Wilwood's new BP-20 Smart Pads, which are best suited for extreme duty, either on the street, or track. Rounding out the kit is precision machined caliper brackets with high-strength, corrosion resistant mounting hardware.

Delivering high performance with style, these brake kits from Wilwood are the perfect upgrade for any C5 or C6 enthusiast who is serious about sport driving or enjoys hot lapping in track day sessions.
