

Combination Proportioning Valve Mounting Bracket Kit

Kit Highlights:

- Wilwood finally has an elegant answer to the question, "Where do I mount my Combination Proportioning Valve?" with their new Mounting Bracket Kits.
- Specifically designed to work in conjunction with Wilwood Aluminum Tandem Master Cylinders (P/N's 260-8555, 260-8556, 260-9439, 260-12900 or 260-13375), in manual or boosted system applications.
- Stainless steel fluid tubes are precision bent with preinstalled stainless tube nuts for a simple bolt-on installation between the Combination Proportioning Valve and the Wilwood Tandem Master Cylinder.
- Stainless steel button head fasteners thread into the black e-coated bracket for a simple installation and years of durable, rust-free performance.
- The Retrofit Mounting Bracket Kit (right or left hand) includes the bracket, fluid tubes, mounting hardware and spacers. The complete Mounting Bracket Kit (right or left hand) includes all the mounting hardware, plus a Combination Proportioning Valve, P/N 260-11179.
