

## Wilwood Disc Brakes Releases Aero6-DM Brake Kits for Ford Bronco and Ranger

## Camarillo, CA • December 2023

Wilwood has engineered new Aero6-DM direct-mount bolt-on brake kits for 2019-present Ford Ranger trucks and 2021-present Bronco SUVs that work with most 17" and larger wheels. These kits are designed to be fully-compatible with factory rear brakes, master cylinder, ABS, and computer systems.

The Aero6-DM kits provide more holding power, easier modulation at low speed, and better pedal feel for more confident braking in daily street performance. Larger pads and rotors provide greater thermal capacity for high-demand highway, off-road applications, towing and hauling, and commercial workloads.

Forged aluminum six piston Aerolite direct-mount calipers are optimized to bolt directly to the Ford spindle and deliver improved clamping force. Rotors are 13.38" x 1.25" premium long-grain carbon, iron alloy, for increased braking performance when paired with Wilwood's SmartPad<sup>™</sup> BP-"Q" ceramic-based compound dual-sport brake pads. Choose GT slotted or SRP drilled and slotted rotor faces. Calipers are available in gloss red or black powder coat, and 22 additional color choices (additional charges apply). Stainless braided Flexline kits are included.

MSRP: starts at \$1,787.51
