

### Superlite 13.50" REAR Brake Kits

- ✓ 2007-18 Jeep JK Wrangler
- ✓ 2018-21 Jeep JL Wrangler
- ✓ 2020-21 Jeep JT Gladiator

Wilwood has engineered a solution for rear big brake kit applications for Jeep Wrangler and Gladiator covering model years from 2007 - 2021. Brake kits are designed to be compatible with factory master cylinders, ABS where used, OE or Wilwood front brake kits, and will fit most 17" or larger wheels. Replace your factory floating calipers with Wilwood's rigid forged aluminum **Superlite** calipers and premium alloy rotors for improved performance, pedal feel, and better thermal capacity for all types of Jeep driving, including highway, towing, commercial, and off-road use. (Note: dust shield modification is required for proper fitment)

#### KIT FEATURES:

- Mounts to factory axle flange and retains full use of the original parking brake
- Provides greater brake torque with increased thermal stability, and fits behind most 17" and larger wheels
- Compatible with the factory master cylinder, ABS and all electronic controls

#### CALIPER: FNSL4R

- Forged narrow **Superlite** aluminum four piston calipers provide more rigidity and a more even clamping force to minimize deflection for a better pedal feel
- Calipers available in gloss black or red powder coat, or 26 additional color options (additional charges may apply)

#### ROTORS: GTB or SRP

- 13.50" x .81" premium-grade iron alloy rotors with 36 vanes for proper cooling and includes a lightweight aluminum hat
- Choose E-coated **GTB** slotted, or **SRP** drilled and slotted rotors

#### PADS: BP-Q PERFORMANCE PAD

- BP-Q ceramic-based, dual-sport brake pad for everyday street or performance driving (additional compounds available)

#### INSTALLATION PARTS:

- Stainless steel flexlines and premium-grade hardware included

**FNSL4R Four Piston Brake Kit  
13.50" GTB Slotted Rotor**

**CALIPER
