

STREET & TRACK DYNALITE / DYNAPRO MAZDA MIATA, NA, NB, ND BIG BRAKE KITS

Wilwood has engineered new performance brake kits for Miata enthusiasts. An oversized rotor is specced for more brake torque on NA/NB (1990-'05) and ND (2016-'24) platforms, clamped by Wilwood's workhorse forged aluminum four piston **Dynalite** street, or **Dynapro-ST** race calipers with **Thermlock™** pistons for big brake stopping power. Both are perfect complements to tire and suspension upgrades, and are fully compatible with your OE master cylinder and ABS.

KIT FEATURES:

- Complete bolt-on installation using factory hubs and spindles; no modifications are required
- Compatible with the factory master cylinder, rear brakes, ABS, and all electronic controls

CALIPERS: DYNALITE, DYNAPRO-ST

- Rigid forged billet aluminum four piston calipers with Type III Mil-Spec hard-anodized surfaces resist bore wear and abrasion
- Street kits available in gloss red or gloss black powder coat, or 26 additional colors (extra charges apply)

ROTORS: ULHP, SRP, GT SLOTTED

- Street kits available in 32-vane plain or **SRP** drilled and slotted faces in iron alloy; 11.75" x 0.81" (298mm x 21mm)
- Race kits feature a 40-vane full floating **Spec37** GT slotted rotor with Wilwood's **Lug-Drive** snap ring technology, eliminating mounting bolts; 11.75" x 0.81" (298mm x 21mm)
- Forged aluminum mounting hat reduces weight

BRAKE PADS: STREET or TRACK SPEC

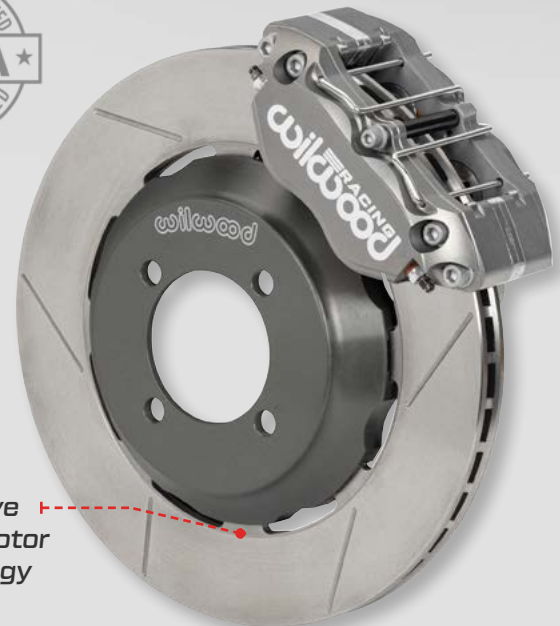

- **BP-10** street-performance compound provides good response at low temperatures and resist fading as heat increases
- **BP-35** race-spec compound provides high friction with improved response as temps increase with a predictable linear feel
- Other compounds available for your application

INSTALLATION PARTS:

- Includes high-performance braided stainless Flexlines
- Forged aluminum caliper brackets and all premium-grade installation hardware also included
