

DIRT SPRINT CAR **DYNAPRO SINGLE** **10.20"** LEFT FRONT BRAKE KIT

Wilwood now manufactures a high-performance scalloped rotor kit that is also a great option to fine-tune the left front on a winged **Sprint Car**. The smaller, lighter 10.20" steel rotor package provides better wheel clearance and offers improved pedal feel, making this kit the most tunable, controllable feel to fit any track/driver needs by simply changing brake pad compounds.

CALIPER: DPS, DYNAPRO SINGLE

- Forged aluminum that weighs in at less than two pounds
- Universal mounting options for front or rear bearing carrier location
- Low fluid displacement, translating to better pedal feel with less travel
- Type III Hard Anodized shell inside and out adds protection for longer life

ROTOR: STEEL SCALLOPED

- Steel scalloped and drilled 10.20" x 0.31" rotor
- Black E-coat finish provides oxidation protection
- Popular 3 x 5.00" mount, weighs only 3.20 lbs.

BRAKE PADS: BP-40

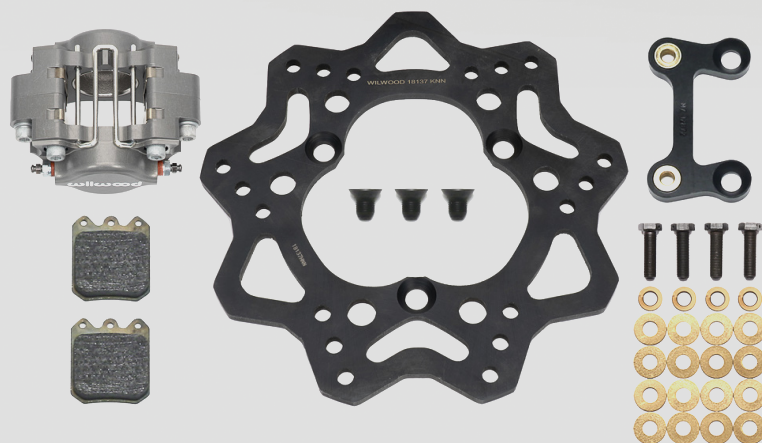

- Composite metallic **BP-40** compound for high temperature, provides long life, and has great pedal feel
- Tuning pads **BP-28** and **BP-45** also available

INSTALLATION PARTS:

- All premium-grade installation hardware included with kit

**Dynapro Single
Sprint Brake Kit
Left Front**
