NEXT-GEN PERFORMANCE BRAKING IN A DIRECT-FIT *SUPERLITE* UPGRADE

The **XRS** series represents the next evolution of Wilwood's legendary Superlite calipers. Advanced FEA design and precision CNC machining transform premium forged aluminum into a stronger, lighter, more rigid platform. With improved airflow, innovative X-bridge reinforcement, and race-proven durability, **XRS** delivers unmatched control on both the street and track days.

FEATURES:

XRS: Next-Gen Superlite Evolution

Built on decades of race-proven Superlite performance—reengineered to meet today's demands

Innovative X-Bridge Reinforcement

Exclusive center X-bridge design boosts strength and minimizes deflection—engineered for modern performance requirements

Stronger. Lighter. More Rigid.

Advanced FEA design + premium forged aluminum deliver up to 15% weight reduction with increased structural rigidity

Flexible Application Design

Internal fluid ports and dual bleed screws enable use in front or rear applications with differential-bore setups

Enhanced Cooling & Airflow

Optimized open architecture improves heat dissipation for consistent braking performance

Ultra-Lightweight Performance

As light as 4.5 lbs, reducing unsprung weight for better handling and responsiveness

Direct-Fit Upgrade

Uses existing Forged Billet Narrow Superlite, 6 and 4 piston radial mounting patterns – enabling easy integration with immediate gains

Built for Durability

High-temp seals and stainless steel pistons increase service life and reliability
