

**FOR IMMEDIATE RELEASE:**

## **Wilwood Disc Brakes Introduces Narrow Superlite Inboard Brake Kit for Dirt Sprint Cars**

**Camarillo, CA • July 2024**

Wilwood has released a new powerful brake kit for the inboard position on Dirt Sprint Cars. The kit combines the new six piston Forged Narrow Superlite (**FNSL6R/ST**) for .38" wide rotors, the recently released **XRZ Axle Clamp** 46-tooth spline saver with a dynamically-mounted rotor adapter plate, and a premium **Super Alloy** slotted 12.00" titanium rotor.

Using its most advanced technology, Wilwood designed, manufactured, and assembled this track-proven race kit from decades of experience working with race teams. The result is a high-strength forged aluminum caliper body providing superior clamping force with minimal weight. Superlite calipers feature **Thermlock** insulated differential bore pistons for increased heat resistance and pad life. A **Type III Hard Anodized** finish is applied to the caliper body and piston bores providing a tough ceramic-oxide coating that resists wear and corrosion.

Kits include **SmartPad BP-28** compound brake pads (other tuning compounds also available), premium-grade hardware, and a strong aluminum caliper mounting bracket.

**MSRP:** starts at \$1,786.34
