

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Jeep Wrangler/Gladiator 13.50" Superlite Rear Kits 2007-21

Camarillo, CA • April 2025

Wilwood has engineered a new rear big brake kit to accompany its popular front Aero6-DM brake kits for Jeep Wranglers (JK 2007-18, JL 2018-21) and Gladiators (JT 2020-21). Upgrade the factory floating calipers with rigid forged aluminum **Superlite** calipers and larger 13.50" premium alloy rotors for improved performance, pedal feel, and better thermal capacity.

These rear kits were designed to be compatible with factory master cylinders, ABS where used, OE or Wilwood front brake kits, and will fit most 17" or larger wheels. The 13.50" **Superlite FNSL** four piston rear kits provide more holding power and greater brake torque for all types of Jeep driving, including highway, off-road, towing, hauling, and other high-demand applications.

Kits include **BP-20** dual sport performance brake pads, 13.50" x .81" premium-grade iron alloy rotors with 36 vanes for proper cooling, plus a lightweight aluminum hat. Engineered to mount onto the factory rear axle flange and retain full use of the original parking brake. Currently available with E-coated **GTB** slotted rotors that minimize dirt and debris accumulation, or an **SRP** drilled and slotted version to be available Fall 2025. Calipers are available in gloss red or black powder coat with 26 surcharge color options available. Stainless steel braided Flexline kits and premium-grade hardware included. (Note: dust shield modification is required for proper fitment). Visit www.wilwood.com for more information.

MSRP: starts at \$2,235.71
