

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Aero-DM Direct Mount Brake Kits for 2022-2024 MBZ 2500 Sprinter Van

Camarillo, CA • April, 2025

Wilwood has engineered new front and rear **Aero-DM** direct-mount bolt-on brake kits for 2022-2024 Mercedes 2500 Sprinter Vans developed specifically for ease of installation and reduced cost and will work with most 17" and larger wheels. These kits are designed to be fully compatible with factory front and rear brake mounting positions, master cylinders, and ABS computer systems.

The **Aero-DM** kits provide more holding power and brake torque, easier low-speed modulation, with a much better pedal feel for more confident braking performance and daily use. Larger pads and rotors provide greater thermal capacity and heat dissipation for high-demand highway, off-road, towing, hauling, and commercial workload applications.

Forged aluminum six-piston **Aerolite** front (**Aero6-DM**) and four-piston **Aerolite** rear (**Aero4-DM**) are both direct-mount calipers engineered to bolt directly to the MBZ 2500 Sprinter spindles/hubs, delivering improved clamping force. Rotors are 13.25" x 1.25" front and 13.25" x 1.10" rear utilizing premium long grain carbon and iron alloy that substantially increase braking performance when paired with new Wilwood **BP-Q** ceramic-based compound brake pads. Protective E-coated 48 vane rotors come in a **GTB** slotted configuration. Calipers are available in gloss red or black powder coats, with 26 surcharge color options available (additional charges may apply). Stainless steel braided Flexline kits and premium-grade hardware included. Visit www.wilwood.com for more information.

MSRP: starts at \$2,028.25
