

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases TX6R Rear Big Brake Kit for 2020-24 GM 2500

Camarillo, CA • September 2025

Wilwood has added a new **TX6R Tactical Xtreme** rear big brake kit option to complement the existing front **TX6-DM** performance brake kits on 2020-2024 GM 2500 trucks. Upgrading late model GM HD 2500 trucks from smaller OE cast iron calipers and rotors to Wilwood six piston radial mount calipers and larger rotors will provide increased brake torque, thermal capacity and driving confidence for heavy-duty highway use, hauling, towing, off-road use, and mountain driving.

The stress-flow forged aluminum **TX6R** caliper design is identical to those used on tactical armored vehicles weighing up to 14,000 pounds and clamp down on **Spec37** E-coated **GTB** slotted, iron alloy 16.00" x 1.38" military-grade rotors with 60 curved vanes for more efficient cooling. An aluminum hat accommodates the factory parking brake, and the complete kit remains compatible with the OE master cylinder and ABS system. Calipers are equipped with **BP-Q** ceramic-based dual-sport brake pads and are available in gloss red or black powder coat, or a wide variety of other color options (additional charges apply).

MSRP: starts at \$3,536.93
