

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases New Front Big Brake Kit Options for 2014-19 C7 Corvette

Camarillo, CA • October 2026

Wilwood announces new big brake kit options using 13.06" and 14.00" rotors for the C7 Corvette (2014-19), running the OE upright and hub. Choose from Wilwood's array of lightweight, forged aluminum calipers based on wheel clearance, style, or preference. Selections include the venerable **FNSL6R** (Superlite), **AERO6R** (Aerolite), or the new next-generation X-bridge **XRS6R**.

Brake kits feature a two-piece rotor with an aluminum hat assembly that allows heat cycles without distortion, improving longevity and consistent performance, reducing unsprung weight, and mounting easily to the OE upright. Installed kits work with the factory master cylinders, OE rear brake kits, and ABS systems.

Calipers are **Gloss Black** or **Competition Red** powder coat with many other color options (additional charges apply). Proprietary **Spec37** premium-grade 1.25" wide iron alloy rotors come with 48 or 72 curved cooling vanes, and your choice of black E-coated **SRP** drilled and slotted with **BP-10** street-performance pads, or **GTB** slotted with **BP-20** higher friction pads for street and track day use.

Kits include aluminum mounting brackets and premium-grade hardware (Flexlines available separately to fit your application). Visit wilwood.com for more information.
