

FOR IMMEDIATE RELEASE

Wilwood's New Race Quality Disc Brake Kits for the BMW E46

Camarillo, CA June 1, 2011

Wilwood Engineering has recently introduced a front brake kit for the 1999-2005 BMW E46 that features the latest in Big Brake Technology. This track-tested kit will not only provide better street performance, it makes a huge improvement over the original brakes on the track where consistency counts. The kit features Wilwood's Forged W6A six-piston calipers that work perfectly with the OE master cylinder and ABS functions. The caliper is used with a lightweight two-piece rotor assembly with an aluminum hat and the buyer's choice of GT slotted or SRP drilled and slotted rotors. The complete kit, part number [140-11974](#) comes with the calipers, caliper brackets, rotors, aluminum hats, brake pads, and all the necessary hardware required to finish the installation. The calipers are available in red or black powder coating, so coupled with the rotors, this kit will not only allow your BMW to stop better it will also provide an appearance enhancement. Additionally, custom caliper colors are available by special order for an additional charge. Wilwood performance brake kits are loaded with cutting edge technology built on years of domination in world motorsports and are engineered for easy bolt-on installation. Wilwood's Big Brake Kits are designed to meet the high performance demands of today's tire, wheel and suspension technology.
