

**FOR IMMEDIATE RELEASE:**

## **Wilwood Disc Brakes Announces New Front and Rear Brake Kits for the 2015 Ford Mustang**

**Camarillo, CA • August, 2015**

Wilwood's forged aluminum Aerolite radial mount calipers and big diameter **Spec37** alloy directional vane two-piece rotors are combined in these all new brake upgrade packages for the 2015 Ford Mustang. The front kits feature Aerolite 6R six piston calipers with a choice of 14" or 15" diameter rotors. Rear kits feature the Aerolite 4R in conjunction with MC4 mechanical parking brake calipers over 14" rotors. Front and rear kits can be style matched with either gloss black or red powder coat finish calipers, with a choice of either SRP series drilled and slotted or GT competition series slotted face rotors. BP-10 compound *SmartPads* are included to provide high performance response for the street or strip.

These new Aerolite kits have been configured for matched performance with the OE master cylinder and are fully functional with the ABS and all electronic controls. All the necessary hardware, DOT compliant stainless braided flexlines, and parking brake cable kits are all included with a detailed installation guide for a fully bolt-on installation.

M.S.R.P. starts at \$2,105.59 for the front and \$2,049.59 for the rear.
