

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Doubles Facility Size and Production Capabilities

Camarillo, CA • October 2016

Wilwood Engineering, the leader in high-performance disc brakes, has doubled their overall footprint to continue to meet the increased demand for the industry's highest-quality braking solutions.

The acquisition of another 100,000 square foot building, located in close proximity to the company's headquarters in Camarillo, CA, is a direct reaction to their year-over-year growth.

"We are extremely excited for what this expansion means to the company in regards to speed-of-production and overall delivery to our customers," said Bill Wood, owner of Wilwood Engineering. "Over the past forty years we have continued to advance our product technology, and this expansion is the next logical step. With more manufacturing capabilities and double the size of our shipping and warehouse footprint, Wilwood is primed to continue delivering first-class products to our customers."

Wilwood's second building officially opened in early 2016 and houses expanded product manufacturing, along with all warehouse and shipping operations.

About Wilwood Engineering

Founded by Bill Wood in 1977, Wilwood Engineering designs and manufactures high-performance disc brakes and components from their headquarters in Camarillo, California.
