

**FOR IMMEDIATE RELEASE:**

## **Wilwood Disc Brakes Introduces New All-Terrain AT6 Off-Road Racing Calipers**

**Camarillo, CA • August 2018**

Wilwood's new All-Terrain AT6 forged aluminum racing caliper is designed, engineered, and purpose-built to endure the rigors of off-road truck and buggy racing. The AT6 combines the latest technologies in manufacturing materials and processes built "tough enough for Baja." The caliper covers a wide range of racing classes in SCORE, BITD, Ultra-4, Pre-Runner, and all similar sanctions of desert and off-road competition, and is well-suited for both short course and endurance length events.

Every caliper is hard anodized throughout to promote long wear and abrasion protection. Calipers are also available in red and black powder coat finish. They include stainless steel pistons or optional Thermlock® pistons for high-efficiency heat management, durability and corrosion resistance in the harshest environments. Brake pad compounds are available for virtually every application.

MSRP starts at \$665.94.
