

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Announces New 1969-1976 Triumph TR6 Front Brake Kit Upgrades

Camarillo, CA • June 2020

Wilwood is pleased to announce the release of a new front brake kit engineered for the 1969-1976 Triumph TR6, as well as the 1965-1967 TR4A and 1968-1969 TR250. This upgrade kit is ideal for big brake performance with less pedal effort over factory brakes. The two-piece rotor assemblies attach to the OE hub, and BP-series *SmartPads* add high response and increased resistance to fading.

The forged billet aluminum body with four stainless steel pistons weighs only 3.50 pounds. The 6.36 sq. in. surface area brake pads clamp down on your choice of 11" diameter Ultralite 30-vane plain or SRP drilled and slotted rotors. Calipers are available in red or black powder coat, or 22 additional color options. All-inclusive kits include DOT approved stainless steel braided flexlines, all mounting hardware and a detailed instruction guide.

MSRP starts at \$800.79.
