

FOR IMMEDIATE RELEASE:

Wilwood Racing Releases Quick Disconnect No-Bleed Brake Line Fittings

Camarillo, CA • October 2022

Wilwood Racing has released their new dry break, quick disconnect -3 AN fittings. A quarter turn disconnects the line with no tools needed. The internal high-tension spring-loaded seal provides a positive lock between ends preventing air from entering and fluid from escaping.

Race-proven in circle track, off-road, and endurance road racing, the quick connect/disconnect fittings enable changing a caliper, master cylinder, or any other brake fluid component quickly without the need to bleed air. Configure hydraulic component spares with the appropriate adapter and pre-bleed for instant use, when needed.

Precision-machined from aluminum with a Type III hard anodized finish, the Wilwood no-bleed quick disconnect fitting weighs only 0.6 ounces. Once connected, they are as secure as any threaded brake line fitting.

MSRP: \$356.37
