

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases Street and Race Kits for Mazda MX-5 Miata ND

Camarillo, CA • October 2023

The 2016-23 Mazda MX-5 Miata ND is a fun, lightweight sports car, but the factory brakes left room for improvement. Wilwood's motorsports-proven Dynapro forged aluminum, four piston radial mount calipers deliver improved stopping power with less deflection and a more consistent pedal feel. The 11.00" x 0.81" (280mm x 21mm) GT slotted rotors are machined from proprietary **Spec37** iron alloy with 72 internal cooling vanes.

The race-spec kits feature floating rotors, dynamically mounted to eliminate thermal stresses, and aggressive BP-40 racing brake pads, plus Type-III hard anodized calipers. Street kits use the same calipers and fixed-mount rotors with street-performance BP-10 brake pads. Street calipers are available with a gloss black or red powder coating, plus 22 additional colors (extra charges apply). Premium hardware and braided stainless Flexlines included.

MSRP: starts at \$1,395.51

MSRP: starts at \$1,716.06
