

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases TX6-DM Direct-Mount Big Brake Kits for Heavy Duty Trucks

Camarillo, CA • August 2024

Wilwood has engineered new front **TX6-DM** Direct-Mount bolt-on brake kits to fit many heavy duty trucks and most 20" and larger wheels. The first release includes fitments for 2005-22 Ford F-250/350, 2011-UP GM 2500/3500, and 2014-23 Ram 2500/3500 trucks. These kits are designed to be fully compatible with factory rear brakes, master cylinders, ABS, and computer systems. The **TX6-DM** kits provide more consistent braking and pedal feel, with increased thermal capacity to inspire confidence in high-demand applications, including towing, hauling, and commercial use.

Forged aluminum Truck **Tactical Xtreme** Direct-Mount six piston calipers are optimized to bolt directly to the factory spindle and deliver improved clamping force. E-coated rotors resist corrosion, measure 15.00" x 1.50", are made from premium long-grain carbon iron alloy, and are **GTB** slotted with 48 internal vanes for better air flow. New Wilwood **Smart-Pad™** BP-Q ceramic-based, dual-sport brake pads are formulated for fade resistance and long life in everyday street or severe-duty use. Calipers are available in gloss red or black powder coat, and 24 additional color choices (additional charges apply). Stainless braided Flexline kits and premium hardware are included.

MSRP: starts at \$2,777.54
