

DISC BRAKES wilwood

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Expands Chevy Impala Fitment With Larger Front Brake Hub Kits

Camarillo, CA • August 2024

Wilwood has engineered two new larger front brake kits to expand the options for 1965-70 Chevy Impala. The new big brake hub kits use 12.88" and 14.00" rotors to fit most 17" and 18" wheels, adding to the existing kits available for 1959-70 Impala in 11.00" and 12.19".

The new complete bolt-on performance brake kits are designed to fit front OE Impala drum or disc spindles using Wilwood's competition-proven radial mount **Superlite 6R** (FNSL6R) or **Aerolite 6** (AERO6) six piston calipers. Both caliper models are rigid, forged aluminum featuring one-piece stainless steel pistons housed in Type III hard anodized bodies and high-temperature seals. Colors offered are Competition Red or Gloss Black powder coat, and 24 optional color choices (additional charges apply).

High-performance **Spec37** iron alloy rotors are E-coated and available in **GTB** slotted or **SRP** drilled and slotted faces with 48 or 72 directional curved vanes. Forged GT aluminum hats provide strength with less weight, and machined billet hubs with screw-on aluminum caps will mount directly to OE spindles. Wilwood's **BP-10 SmartPad** street performance brake pads offer smooth and consistent response with longer wear (other compounds available).

MSRP: starts at \$2,316.15
