

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Expands TX6R Big Brake Kit Fitment for RAM 2500/3500 Trucks

Camarillo, CA • August 2024

Wilwood's **Tactical Xtreme TX6R** big brake kits are used on heavy-duty trucks, including armored vehicles up to 14,000 lb GVWR. The fitment for Ram heavy-duty trucks has been expanded to include 2500 and 3500 models from 2014 through 2023 for both front and rear kits.

Bolt-on brake kits replace OE twin-piston sliding calipers with Wilwood's rigid forged aluminum, differential bore, six stainless steel piston **TX6R** calipers and are fully compatible with the factory master cylinder, ABS and electronic controls. Proprietary **Spec37** iron alloy **GTB** slotted rotors are over an inch larger in diameter at 16.00" x 1.38" with 60 internal cooling vanes to provide increased thermal capacity and brake torque. A black E-coat finish provides corrosion protection throughout.

Fade-resistant **SmartPad BP-Q** compound brake pads are included with additional compounds available for your application. Kits are designed to fit most 20" and larger wheels for off-roading, hauling, towing, commercial, and heavy-duty highway use. Calipers are finished in gloss red or black powder coat with 24 other color options available (additional charges apply).

MSRP: starts at \$2,858.74
