

**FOR IMMEDIATE RELEASE:**

## **Wilwood Disc Brakes Releases Street & Track Big Brake Kits for MX-5 Miata**

**Camarillo, CA • March 2025**

Mazda MX-5 Miata owners now have more options for improving the performance of their brake system while complementing tire or suspension upgrades. Wilwood has engineered front big brake kits to provide more torque using 11.75" diameter rotors and pairing them with lightweight, rigid, forged aluminum four piston calipers. Options include **Dynalite** calipers for high-performance street cars or **Dynapro-ST** calipers with **Thermlock™** pistons for demanding track use.

Complete kits are engineered to bolt on to factory hubs and spindles without modification and are compatible with the OE master cylinder and ABS, if present. High-performance street kit options include 32-vane **ULHP** plain face or **SRP** drilled and slotted rotors and standard powder coat gloss red or black four piston calipers with 26 surcharge color options available. Race kits feature 40-vane **GT** slotted rotors with Wilwood's floating mount **Lug-Drive** snap ring technology and Type III Mil-Spec hard-anodize finished calipers.

Wilwood's **BP-10** performance brake pads are standard in the street kit, and **BP-35** race-spec pads in the track kit. Other compounds are available to suit your application. Braided stainless steel **Flexlines** and premium-grade hardware are also included.

MX-5 Miata fitment includes NA/NB model years 1990-05, and ND models from 2016-24. Visit [www.wilwood.com](http://www.wilwood.com) for more information.

**MSRP:** starts at \$1,000.08
