

FOR IMMEDIATE RELEASE:

Wilwood Disc Brakes Releases New HM7 Hydra-Mechanical Rear Caliper for Select Honda Civics and Acura Integras

Camarillo, Calif • October 2026

Wilwood has released its new **Hydra-Mechanical** rear brake caliper, **HM7**, for 1988-2004 **Honda Civics** and 1990-2001 **Acura Integras**. The HM7 combines hydraulic stopping power with a cable-activated parking brake for holding power, all in a single caliper offering a lightweight alternative to factory drum or disc assemblies.

These new rear kits are fully compatible with ABS, factory master cylinders, and pair well with Wilwood front brake kits for these cars. Calipers are available in **Gloss Black** or **Competition Red** powder coat, with many other color options available (additional charges apply). One-piece, easy-installation, solid rotor choices are 9.37" x .39" with **SRP Drilled & Slotted** or **Plain Face**. The rotors are **E-coated** black for excellent corrosion resistance and are paired with Wilwood's **BP-10** street-performance brake pads for improved friction.

Bolt-on brake kits include aluminum mounting brackets, stainless steel **Flexlines**, and premium-grade hardware. Parking brake actuator cables are sold separately using **P/N 330-9371**. Visit wilwood.com for more information.

MSRP: starts at \$811.38
