

FOR IMMEDIATE RELEASE:

Wilwood's new W6A Big Brake Front Kits for 1999-2006 E46 BMW's

Camarillo, CA, November 1, 2011

Wilwood Engineering has recently introduced a new W6A big brake front kit that features the latest in disc brake technology. These kits are available for select model years for the 323i, 325i, 328i, 330i and 320i (Canada). These kits are configured for high performance street or track competition and are compatible with the original equipment master cylinder and ABS system.

Kit features Wilwood's forged W6A 6-piston differential bore calipers in black powder coat clamping down on oversized 14.00" diameter GT asymmetrical face slot pattern rotors. The kit, part number [140-11974](#), comes with aluminum hats, caliper mounting brackets and all necessary hardware for an easy, bolt-on installation. Optional SRP drilled and slotted rotors as well as red powder coated calipers are also available.

Wilwood BP-10 high performance street pads round out the kit. Other brake pad compounds, including those for off-road applications, are also available.

Stainless steel braided flexline hose kit, part number 220-11983 is necessary, but not included with the kit and must be ordered separately.

All of Wilwood's performance brake kits are loaded with cutting edge technology built on decades of domination in world motorsports. These kits will not only exceed your braking demands, on and off the track, but also enhance the appearance of your BMW.
