

FOR IMMEDIATE PRESS RELEASE
Wilwood Big Brake Kits for the 2005 - Present Mustang

Camarillo, CA June 3,2010

Wilwood Engineering announces improved good looks and braking performance for the new 2005 - present Mustang. Wilwood's bolt-on [Big Brake Front kit](#) features billet CNC machined Superlite 6 calipers clamping 2-piece 13" or 14" diameter SRP drilled and slotted, curved vane rotors. For reduced rotating weight and improved stability under thermal load these rotors bolt to black anodized aluminum alloy hats. Slotted only GT Rotors are also available for track day applications where high heat becomes a factor. Included in this kit are precision machined caliper brackets, high-strength, corrosion resistant mounting hardware, along with concise installation instructions.

This kit also features Wilwood's new BP-10 "Smart Pads" with a compound engineered for low dust and low noise plus they are easy on rotors.

Delivering high performance with style, these big brake kits from Wilwood are the perfect upgrade for any '05 - present Mustang enthusiast who is serious about sport driving or enjoys hot lapping in track day sessions.
