## NE Dirt Modified – We've Got You Covered!

Since 1977, Wilwood Engineering has been at the forefront of high-performance disc brake technology and is the most widely used brake brand in motorsports. Located in Camarillo, California, Wilwood is proud to be an American manufacturer that designs and builds all its products locally. Our engineering department uses the latest computer-aided design and manufacturing techniques with finite element analysis (FEA), dynamic testing, and cycle test equipment to find higher performance and more reliable solutions to the most difficult braking tasks, racing. Our extensive inventory of proprietary on-the-shelf components permits us to provide very cost-effective solutions to various needs. We have developed a substantial matrix of brake components and engineering techniques that allow us to quickly and reliably create brake systems for almost any application.

This catalog represents a fraction of what we offer, and we're constantly adding new items. Our complete product line may be browsed on our website, [www.wilwoodracing.com](http://www.wilwoodracing.com), which is the most comprehensive within the racing and performance aftermarket industries. Searching for parts is simple, and if you can't find what you're looking for, **please contact:**
